

The
super-matt
exterior film.

Natural look, pleasant feel.
RENOLIT EXOFOL PFX.

Rely on it.

RENOLIT EXOFOL PFX.

Like real wood.

Matt surfaces are very much in vogue. This new exterior film with an innovative surface gives window profiles, doors and door infill panels the attractive appearance and smooth feel of real wood.

RENOLIT EXOFOL PFX Super-Matt is the name of the new film grade based on the plasticiser free PVC film RENOLIT EXOFOL PX. For optimum naturalness, the deep, flowing wood grain texture VLF is combined with a transparent polyvinylidene fluoride (PVDF) layer. The result is a surface that is practically indistinguishable from real wood.

Durable and easy to clean.

RENOLIT EXOFOL PFX Super-Matt has a very matt surface with low surface tension.

The PVDF surface improves surface protection and increases the films resistant to dirt and chemicals. Dust and dirt particles are prevented from sticking. Water, soap or detergent as well as a soft brush or sponge are sufficient for cleaning. Even stubborn dirt or graffiti can easily be removed.

Pleasant feel

*Wood like
appearance*

*Easy to clean
including
anti-graffiti*

*Innovative
copolymer
technology*

Stay cool, even when it's hot.

Solar Shield Technology (SST) is the heat protection technology used in all RENOLIT EXOFOL films.

IR-reflecting colour pigments reduce the temperature variations between the outer and inner profile surface. As a result, profiles retain their dimensional stability and windows and doors retain their shape.

RENOLIT EXOFOL PFX Super-Matt is primed on the reverse to improve adhesion.

Diagram showing the structure of the exterior film
RENOLIT EXOFOL PFX

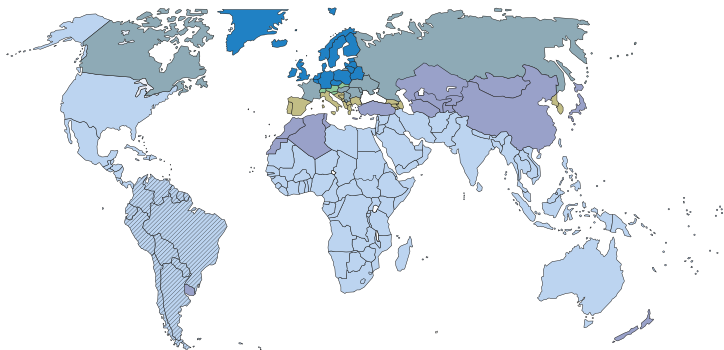

Authentic woodgrain texture.

The surface texture of RENOLIT EXOFOL PFX Super-Matt is varied and harmonises particularly well with our authentic oak décors.

With its structured brushed pore, the surface resembles that of naturally grown oak.

Beautiful and reliable – guaranteed.
