

The perfect look for the interior.
Quality and design for the automotive industry.

Leading
Products from
RENOLIT GOR

Who is RENOLIT GOR S.p.A.?

RENOLIT GOR S.p.A. is a member of the RENOLIT Group located in Italy. It was founded in 1972 and today has reached a market leadership with the RENOLIT WOOD-STOCK technology. Numerous certifications ensure the high quality standard of RENOLIT GOR S.p.A.: VISION 2000 - ISO 14001:2004 - ISO 9001:2000 - ISO TS 16949:2002

RENOLIT GOR products are shipped worldwide to our customers who are thermo formers of interior trim components for the automotive market and formworks for the construction market. One of the main advantages is that these products are environmentally friendly and completely 100% recyclable.

Different processes are applicable to convert RENOLIT GOR sheets to finished components: thermocompression process (one-step), vacuum forming, punching, sawing, bending, cutting, drilling, milling, welding, gluing

RENOLIT GOR Product lines

Automotive Market

RENOLIT WOOD-STOCK
RENOLIT TECNOGOR
RENOLIT GORNET
RENOLIT FLUXWOOD

Construction Market

RENOLIT STRATO STOCK

Automotive Market

RENOLIT WOOD-STOCK - registered trademark for a family of composites and recyclable products made of polyolefin and natural fibres extruded in sheets.

Due to the increasing demand from the market, RENOLIT GOR has developed new product lines with high performance characteristics specific to applications named RENOLIT TECNOGOR, RENOLIT GORNET and RENOLIT FLUXWOOD.

RENOLIT TECNOGOR - based on PP, natural long fibres and lamellar fillers with an especially low weight and high stiffness.

RENOLIT GORNET - by the use of special substrates these sheets are especially high impact resistant.

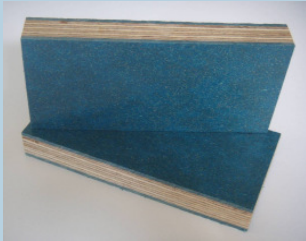

RENOLIT FLUXWOOD - material is able to include brackets, pins or ribs during the thermoforming process without the need of any other technologies or additional steps. Further specification is a high elongation and flow.

Applications: door panel, seat back, boot, head liner, pillar, centre console, rear shelf etc.

Construction Market

RENOLIT STRATO-STOCK – outperforming composite panels with a wood core covered by two sheets. These sheets are available in several colours and thickness.

Applications: mainly formworks

Diversification: Aesthetic sheets

Currently our customers are able to choose in-between 150 different kinds of technical solutions and the flexibility of our process offers the possibility to adapt or develop new products specifically to meet our customers' requirements. This means that there's a wide range of applications where our products can be used. New developments like aesthetic sheets are for example already used within the furniture industry.

Service & Support

The following services are available for **RENOLIT GOR** customers worldwide in order to give as much support as possible:

- selection of the suited sheet
- recommendations on product design and mould construction
- optimisation of sheet shapes to minimise your production waste
- support within the design of the production equipment, mould trials at our site
- process optimisation
- new development of formulations and sheets
- buy back of production waste

Thus support from concept to completion and beyond.

World wide capacity

As a result of the geographical expansion within the last years **RENOLIT GOR** created global networks. Benefiting by this network of Joint Ventures located in China, Brazil and India, **RENOLIT GOR** is able to supply the world market.
