

CHEMICAL PROPERTIES OF ONDEX BI-STRETCHED SHEETS (POLYVINYL CHLORIDE)

Non plastic coated Polyvinyl Chloride sheets resist a very broad range of chemicals such as: alkalis, acids (and corresponding salts), alcohols, salty air (seashore), and most chemicals that are usually aggressive for synthetic materials. These sheets are not food for rodents and termites. Our Laboratory is at your disposal to study the resistance of ONDEX sheets with any chemical that is not on the list of the some 200 cases already studied.

PROPRIÉTÉS CHIMIQUES DES PLAQUES ONDEX (POLYCHLORURE DE VINYLE)

Les plaques en Polychlorure de Vinyle Non Plastifié résistent à un spectre très large de produits chimiques tels que : alcalis, acides (et sels correspondants), alcools, air salin (bordure de mer) et à une grande partie des produits chimiques habituellement agressifs pour les matériaux de synthèse.

Elles ne sont pas un aliment pour les rongeurs et les termites. Notre Laboratoire est à votre disposition pour étudier la résistance des plaques ONDEX avec un produit chimique qui ne figure pas dans la liste des quelques 200 cas déjà étudiés.

| MATCHING VALUES | Valeurs correspondantes | Symboles |
|--|--|----------|
| real resistance | résistance effective | 1 |
| limited resistance | résistance limitée | 2 |
| does not resist | ne résiste pas | X |
| limited resistance due to slight water absorption which does not significantly alter the mechanical properties | résistance limitée du fait d'une légère absorption d'eau, n'altérant pas de façon sensible les propriétés mécaniques | 2A |
| real resistance with slight surface blackening | résistance effective avec léger noircissement superficiel | 1N |
| limited resistance with slight surface blackening | résistance limitée avec léger noircissement superficiel | 2N |
| Non available | Non disponible | --- |
